INDEX TO VOLUME I

ACKERMAN, N. W.: Personality in Neurodermite—A Case Study, 366–375
Active-passive, definition, 253
Addiction, surgical, case report, 325–328
Adiposis, anorexia nervosa following, 336–344
Adiposogenital dystrophy, hypophyseal and hypothalamic involvement, 24–25
Adrenalin, hypothalamic effect of, 34
  test, in cardiovascular neurosis, 315
Adrenals, diabetes mellitus and, 530–531
  in essential hypertension, 188
  in mental deficiency, hypothalamus and, 505
Akinesia, after ventriculography, 554
ALEXANDER, F.: Emotional Factors in Essential Hypertension, 173–179
—— Psychoanalytic Study of a Case of Essential Hypertension, 139–152
—— Psychological Aspects of Medicine, 7–18
Allergy, bronchial asthma and, psychiatric aspects, 213–214
Amenorrhea, anorexia nervosa causing, 336
Anal eroticism, definition, 253
ANDERSON, O. D., PARMENTER, R., and LIDDELL, H. S.: Some Cardiovascular Manifestations of the Experimental Neurosis in Sheep, 93–100
Androgen, homosexual behavior induced by, in guinea pigs, 453–460
Anorexia nervosa, adiposis preceding, 336–344
  amenorrhea in, 336
  anterior pituitary extract in, 348–350
  estradiol benzoate in, 339, 342, 347
  etiology, 357–363
  historical facts, 335–336
  physical observations, 356–357
  Progynon-B in, 339, 342, 347
  psychiatric observations, 335–365
  somatic summary (table), 358–361
  treatment, 336–354 (case reports), 363–364
Anoxemia test, in cardiovascular neurosis, 317
Apnoea time, in cardiovascular neurosis, 317
Asthma, bronchial. *See* Bronchial asthma
Atropine test, in cardiovascular neurosis, 316
Autonomic functions, hypothalamus regulating, 20, 30–31
Autonomic integration in schizophrenia, 395–413
Autonomic nervous system, somatic motor centers and, 31
Auto eroticism, definition, 253

BARTLETT, H. M.: Recent Developments in the Field of Medical Social Work, 329–330
Behavior, experimental, in rat, 294–308
  neurotic, in animals, 388–396
  See also Emotion
BENEDEK, T., and RUBINSTEIN, B. B.: The Correlation Between Ovarian Activity and Psychodynamic Processes: I. The Ovulative Phase, 245–270
———— II. The Menstrual Phase, 461–485
BLAUROCK, M. *See* SOLOMON, A. P.
Blood pressure, control of, clinical physiology, 101–105
  emotion and, 148–152
  inhibited aggression in psychotics and, 162–172
  in cardiovascular neurosis, 314
  in chronic emotional states, 168–172
  in depression, 164, 166–168
  in schizophrenia, 163–167, 170
  normal, hypertension and, 105–106
  psychoses and, 118–137
  See also Hypertension
Blood vessels, peripheral, control of, 102–104
  in cardiovascular neurosis, 313–314
  narrowing of, 111–116
Book reviews, 331–332, 444–445, 555–557
Bronchial asthma, emotional factors, 207–208
  family constellation and, 212
  fear of water causing, 213
  neurotic traits and, 210–212
  passion and, 209–212
  psychiatric aspects, 203–244
    adrenalin secretion and, 210
    case histories, 216–244
    hereditary factors, 210
    precipitation of attacks, 208–209
    review of literature, 204–207
    treatment, 214–215
  psychotherapy, 214–215
BRUSH, A. L.: Recent Literature Relative to the Psychiatric Aspects of Gastrointestinal Disorders—A Review, 423–428

Carbohydrate metabolism, hypothalamus and, 72–74
Carbon dioxide combining power, in schizophrenia, 404
Cardiotachometer, use of, in experimental neurosis, 93–100
Cardiovascular neurosis, 311–324
  adrenalin test in, 315
  anoxemia test in, 317
  apnoea time in, 317
  atropine test in, 316
  basal metabolism in, 314
  blood pressure in, 314

Cardiovascular neurosis (*continued*)
clinical picture, 311–314
definition, 311
ECG in, 314
exercise test in, 316
exhaustion in, 313
experimental, 93–100
hyperaesthesia in, 313
hyperventilation test in, 316
infusion test in, 316
interpretation, 317–318
organic heart disease and, 320
peripheral disturbances in, 313–314
personality in, 314–315
precordial pain in, 313
preoccupation in, 314–315
psychotherapy, 319
pulse rate in, 314
respiratory patterns, 315
symptoms, 311–314
treatment, 318–319
Caughey, J. L., Jr.: Cardiovascular Neurosis—A Review, 311–324
Central cortex, hypothalamic influences on, 32–36
Cerebral cortex, hypothalamic relations to, 20
hypothalamus influenced by, 30
Cholesterol, in schizophrenia, 404
Cobb, S. *See* McDermott, M. T.

Cold, common, psychogenic factors, 554
Colitis, chronic ulcerative, psychotherapy in, 425
Colon, disorders of, psychotherapy and, 425–427
Conversion hysteria, 14
neurosis and, 553
Cook, S. W.: The Production of "Experimental Neurosis" in the White Rat, 293–308
Cortex, cerebral. *See* Cerebral cortex
Corticohypothalamic relations, 32
Cyanates, in essential hypertension, 189–190

Daniels, G. E.: Neurosis and Diabetes Mellitus, 553
Diabetes insipidus, hypothalamus and, 23–25, 67–72
Diabetes mellitus, adrenals and, 530–531
depression in, 543
emotional factors in, 536–540
gonads and, 532–534
hereditary factors in, 537–538
hypothalamus and, 24, 25, 535–536
liver and, 531
mental disorders and, 540–545
nervous system and, 534–535
neurosis and, 553
pancreas, neurosis, and, 534
pituitary and, 527–530
psychiatric aspects, 540–545
psychic factors in, 527–552
psychic trauma and, 538–540
psychotherapy in, 545–550
schizophrenia and, 542, 543
sexual potency and, 533
thyroid and, 531–532
Daniels, G. E.: Present Trends in the Evaluation of Psychic Factors in Diabetes Mellitus, 527–552
Darrow, C. W. *See* Solomon, A. P.
Dextrose, in shizophrenia, 404
Diencephalon, functions, 37
Drugs, hypothalamic effects of, 34, 65
in essential hypertension, 189–192
Dworkin, S.: Conditioning Neuroses in Dog and Cat, 388–396

Eisenbud, J.: A Method for Investigating the Effect of Repression on the Somatic Expression of Emotion in Vegetative Functions: A Preliminary Report, 376–387
Electroencephalogram, hypothalamus, 33
Emotions, anatomical mechanism, 19
blood pressure and, 148–152
bronchial asthma and, 207–208
chronic, blood pressure in, 168–172
conflicting clinical findings in, 162–163
diabetes mellitus and, 536–540
essential hypertension and, 140–148, 153–161, 173–179
expression of, 44
functional disturbances and, 15–16
gastric motility and, 377–387
hypothalamus and, 19, 20, 35, 77–79
parotid secretion and, 377–387
skin temperature changes and, 271–286
somatic expression of, repressed, 376–387
theories about, 30
Encephalitis, lethargic, 28–29
Endocrine functions, hypothalamus regulating, 20, 22–25
Endocrines, essential hypertension and, 187–189
sexual disturbances and, 533
Endocrinology, psychology and, 13–14, 17
Energy metabolism, hypothalamus and, 62–67
English, O. S. *See* Weiss, E.
Epilepsy, hypothalamus and, 27, 79
Ergotamine, hypothalamic effect of, 34
Eserine, hypothalamic effect of, 34
Estradiol benzoate, homosexual behavior induced by, in guinea pigs, 449–460
in anorexia nervosa, 339, 342, 347
Estrogen, homosexual behavior induced by, in guinea pigs, 449–460

Estrone, production of, 462
Euphoria, hypothalamic stimulation causing, 36–37

Freud, S., theories of, 12
Frustration, experimental data, 199–200
  hoarding and, in rats, 309–310
Functional disturbances, psychogenic, 15–16

Gastric motility, emotion and, 377–387
Gastrointestinal disorders, psychiatric aspects, 423–428
Gestalt psychology, 13
Glands, psychological relations to, 13–14, 17
  See also Endocrines
Gonads, diabetes mellitus and, 532–534
  function, physiological determinations, 250–251, 474, 481–484
    psychological determinations, 251–253, 474, 481–484
  in essential hypertension, 188–189
Grave's syndrome, skin temperature changes in, 285–286
